MISSION

AssetStream aims to reduce poverty and bring financial inclusion by providing unbundled solutions with access to financial services. AssetStream will expand to a full P2P network which will include the local communities that can take personal loans. AssetStream aims to create an extensive micro-lending ecosystem that will be able to bring financially excluded people to the new global economy through blockchain.

TARGET MARKET SOUTH-EAST ASIA

The platform will be able to provide the borrowers with better loan products and conditions. The platform will also be able to provide a steady income ordering for the lenders.

Throughout the platform, we can provide the lenders and borrowers with the legal protection of local laws and regulations. Instead of GFC, we want our unique action to comply to payment.

By using a state token within the platform, we can ensure that the value of the borrowed amount won’t be affected by external sources.

By utilizing the Stellar blockchain, the platform is able to make faster and cheaper transactions compared to other technology.

IOD DETAILS

Tokens created: 3,500,000,000 Tokens
Tokens issued: 2,100,000,000 Tokens
Hard cap: 31,000,000 USD
Soft cap: 4,400,000 USD
Accepted currencies: ETH, USDC
Exchange listing: 10/07/2019

The total budget raised from ICO will be used to develop an in-house financial platform that will be operational as a hub for the lending pool in Thailand market.
